

Defence and Nuclear Energy

Strategic defence capabilities and energy resilience operations that protect and power the UK, its people, values, and interests.

COSTAIN

Together we **shape, create, deliver**

As an integrated delivery partner, we deliver value for money, reduce complexity and provide certainty and success across our customers' projects, programmes and large portfolios to maximise through-life operational value.

Costain - Defence and Nuclear Energy

We shape, create and deliver pioneering solutions that transform the performance of the infrastructure ecosystem.

We are an organisation delivering critical national infrastructure for more than 160 years and are proud of our achievements across this period, including 70 years of design and build of process plants at COMAH sites for the petro-chemical industry, and 30 years design and build of complex solutions on nuclear licenced sites across the UK.

Across defence we support the UK's most strategic systems and the service personnel that use infrastructure to live, work and train for operations.

We combine our civil and defence nuclear energy experience to ensure long term, low carbon energy security as well as sustaining the UK's deterrent programme.

We put collaboration at the heart of everything we do, working in partnership with our clients, stakeholders and supply chain to deliver shared benefits and a lasting legacy to the local economy, the environment and to the communities we serve.

Our core purpose is to enhance people's lives by ensuring nuclear energy security and supporting clean energy generation for a safer, cleaner future.

KEY:

- 1 BAE Systems**
Project Controls Training and Coaching
- 2 BAE Integrated Combat Systems**
Project management and planning
- 3 BAE Systems Submarines**
Supply Chain Management
- 4 Urenco Infrastructure Programme**
Delivery Partner and Front End Design for HALEU Facility
- 5 Sellafield** Decommissioning
Delivery Partnership
- 6 Rolls Royce** PMO Transformation
- 7 to 14 EDF AGR Fleet**
Project Controls Resource Framework
- 15 AWE** A Site
- 16 AWE** Mensa Construction Partner
- 17 Babcock** Devonport Major Infrastructure Projects
- 18 Springfields Westinghouse**
Design and Engineering Framework
- 19 Nuclear Restoration Services**
Magnox Fleet Decommissioning and Asbestos Removal Framework
- 20 Sizewell C** Professional Services Framework

Defence - Construction professional services

The effective operational and commercial management of complex inter-related projects is critical to many defence programmes. Our programme management expertise provides confidence that project delivery will be achieved within agreed time, cost and performance targets.

Civil nuclear - New build, nuclear fuels, decommissioning

Our team of consultants, project and programme managers and engineers offer services across the asset lifecycle, including:

- Integration of extensive supply chains to deliver complex multi-disciplinary projects
- Conceptual and specialist front-end design and engineering
- Asset optimisation consultancy and delivery, improving the performance of existing facilities to allow them to safely operate more reliably and efficiently as well as extending their working life.

From procurement, through construction and installation, to de-commissioning, we create the opportunities and environment to deliver programmes.
